Applicant(s)

HASEGAWA ET AL.

Examiner

Tuan C. To

Art Unit

3663

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 January 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1,2 and 6-13 is/are pending in the application.
- 4a) Of the above claim(s) 6-11 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1,2,12 and 13 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 08 April 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-946)
- 3) ☐ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1, and 12 are rejected under 35 U.S.C. 102 (e) as being anticipated by Carroll et al. (US 20030097211A1).

As to claim 1, Carroll et al. teaches an on-board apparatus mounted on a vehicle comprising: a getting means for getting vehicle model information. For example, in figure 3a, the user interface provides a list of vehicle' country (vehicle model information) for user to select. Carroll et al. teaches the computer system (200) for recognizing vehicle model based on the input signal from the user interface (Carroll et al., figure 2, page 3, paragraph 0037). Carroll et al. further teaches a function setting means which is button (32) (Carroll et al. figure 3b) and another button shown in figure 3c. All of said buttons are utilized to set the design information related to function or operation of the vehicle (Carroll et al., figure 3d, including a list of design data-manufacturer, year, model has been set). Carroll et al. further teaches a display device

Art Unit: 3663

for displaying function design of the vehicle set by said buttons (Carroll et al., figure 2, display 212).

In paragraph 0027, the remote service provider (150) maintains a user database (154) and a service database (152) which stores various types of data such as service data for various automotive services and vehicle models (paragraph 0027, lines 10 and 11), software applications, specifications, parameter, user's manual, and other data related to vehicle diagnoses. In paragraph 0036, Carroll et al. teaches that a user can submit a request to access a web page from the remote service provider (150). The web pages contains user information for the user to retrieve data stored in service database (152) into user database (154). At this point, it is clear that the database (154) stores the vehicle model information downloaded from the service database (152). In addition, the user interface disclosed shown in figure 3b including a layout of screen, thus the storage device (21) as seen in figure 2 comprises information necessary for layout screen as seen in figures 3b-3d.

The statements of intended use or field of use, "for getting...", "for storing...", "for recognizing...", "for setting...", "for displaying..." clauses are essentially method limitations or statements of intended or desired use. Thus, these claims as well as other statements of intended use do not serve to patentably distinguish the claimed structure over that of the reference. See In re Pearson, 181 USPQ 641; In re Yanush, 177 USPQ 705; In re Finsterwalder, 168 USPQ 530; In re Casey, 512 USPQ 235; In re Otto, 136 USPQ 458; Ex parte Masham, 2 USPQ 2nd 1647.

See MPEP § 2114 which states:

Art Unit: 3663

A claim containing a "recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from the prior art apparatus" if the prior art apparatus teaches all the structural limitations of the claim. Ex parte Masham, 2 USPQ 2d 1647

Claims directed to apparatus must be distinguished from the prior art in terms of structure rather than functions. In re Danly, 120 USPQ 528, 531.

Apparatus claims cover what a device is not what a device does. Hewlett-Packard Co. v. Bausch & Lomb Inc., 15 USPQ2d 1525, 1528.

As set forth in MPEP § 2115, a recitation in a claim to the material or article worked upon does not serve to limit an apparatus claim.

As to claim 12, the layout screen in figures 3b and 3c includes selection box for user setting a specific data to model, year of the a vehicle, and therefore in order to that happen, the storage devices shown in figure 2 should store function setting information.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over in view of Carroll et al. (US 20030097211A1) and in view of Kataghishi (US 20040210363A1).

Carrol et al. teaches an on-board apparatus mounted on a vehicle comprising: a getting means for getting vehicle model information. For example, in figure 3a, the user interface provides a list of vehicle' country (vehicle model information) for user to select. Carrol et al. teaches the computer system (200) for recognizing vehicle model based on the input signal from the user interface (Carrol et al., figure 2, page 3, paragraph 0037). Carrol et al. further teaches a function setting means which is button (32) (Carrol et al. figure 3b) and another button shown in figure 3c. All of said buttons are utilized to set the design information related to function or operation of the vehicle (Carrol et al., figure 3d, including a list of design data-manufacturer, year, model has been set). Carrol et al. further teaches a display device for displaying function design of the vehicle set by said buttons (Carrol et al., figure 2, display 212). Carrol et al. fails to teach storage means for storing the vehicle model information and related design information of function information.

The reference to Kataghishi et al. provided to cure the missing features from Carrol et al. by teaching an on-board apparatus to be mounted on a vehicle (Kataghishi et al, figure 1, onboard apparatus 3), wherein said on-board apparatus (3) comprises a

Art Unit: 3663

storage device (34) that stores vehicle model information such as manufacturer ID, car ID, etc. (Katagishi et al., page 3, paragraph 0032, line 7).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the onboard apparatus as taught by Carroll et al. to include the storage device that stores vehicle model information as taught by Katagishi et al. in order to retrieve download information related to a vehicle from a list of vehicle that have previously had vehicle repair services.

Claims 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Carroll et al. (US 20030097211A1) and in view of Borgesson (US 20050203684A1).

Carroll et al. fails to include "function setting information comprises at least one of a navigation function, a mileage measuring function, and a night-vision function".

Borgesson teaches a vehicle control system and method including "function setting information comprises at least one of a navigation function, a mileage measuring function, and a night-vision function" (see paragraph 0080).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to substitute the teachings of Borgesson into the system of Carroll et al. so that the operator user can keep track on the mileage history of a selected vehicle via a screen.

Response to Arguments

The applicant's request of continued examination has been fully considered. The current claims are still rejected.

After carefully considering the application with special attention, the examiner has found the reference to Carrol et al. includes a storage means for storing vehicle model information and design information (see the details of this office action).

Conclusions

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan C To whose telephone number is (571) 272-6985. The examiner can normally be reached on from 8:00AM to 5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jack Keith can be reached on 571-272-6878.

The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

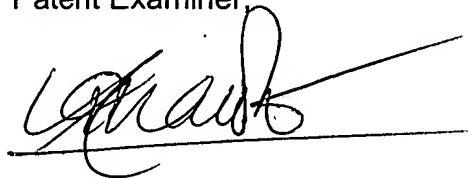

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
